Developer Name: Sam Danso	**Branch Name: Course Creation View - Course Setup with Roster Import** **Current Branch URL:**https://github.com/Fatma-S/simple_html/tree/course-creation-view
Progress:	• Created a local react folder named course-creation, consisting of src and public folder and other json files. • Committed the folder into the existing Course-Creation-View Branch on GitHub. • Created a dashboard that shows courses created by the instructor.
Challenges:	1. Difficulty using react in code manipulations. 2. Encountered errors while executing the code. 3. Tried several methods before the local folder could commit to the GitHub branch.
